STUDIES

EXTRA

My professional skill are vocational commitment. Obtaining optimal results are essential for me to develop the features of originality and easy communication. Of innate way I obtain results of remarkable elegance in any type of creative work. On the other hand, my proactive autonomy is enhanced by good work group.

My abilities are in full swing, there is no day that I discover a new professional face. With an open and flexible attitude I adapt to new content by recycling in new areas. Since the beginning of my training I have tried computer software, therefore, the technical realization is one of the great strengths in my baggage.

My favorite fields are creative design, illustration with a real passion for photography and film productions. I have also perfected my creation in the area of comics for three years at the Joso Barcelona school. I invite you to visit my website: masign.co to see my work.
